ACCESSORIES
Introduction

Medela offers a wide range of accessories that can be combined with our suction pumps. Our reliable pumps and versatile accessories provide healthcare professionals with useful and flexible systems to benefit patients. Medela embodies a strong passion for knowledge and improvement as well as continuous research for even better solutions. We investigate the medical challenges that you are facing thoroughly.

Medela’s 50 years of experience and expertise enable us to develop and offer complete Medical Vacuum Technology Systems that are synonymous with excellent performance. Our products can be used efficiently, reliably and with ease, empowering you to provide high quality medical care to your patients.
The Medela Healthcare range of products fulfils international industrial standards: ISO 9001 and ISO 13485 as well as the American Good Manufacturing Practices guidelines (GMP). Our products carry the CE label in accordance with the directive 93/42/EEC for medical products.

For us, the assurance of a long guarantee is taken for granted.

Symbols

- Disposable article – not meant for reuse
- Autoclavable – for example at 134°/10 minutes
- Not autoclavable – cleaning in a cleaning and disinfecting machine recommended

Accessories

for all products
Clario
Mobility and reliability

The Clario suction pump is ideal for airway suctioning at home, on the road or in the clinic.

Vacuum settings:
- min.: -18 kPa - 131 mmHg
- med.: -36 kPa - 266 mmHg
- max.: -80 kPa - 595 mmHg

Flow: 15 l/min

Vario 18
Versatility and convenience

Vario 18 is a medical suction pump and an all-rounder for hospitals, clinics and homecare.

Vacuum settings:
- max.: -75 kPa - 563 mmHg

Flow: 18 l/min

General Accessories

- Canister set
  Ref. 074.0001
  - For collecting secretions when using the Clario pump
  - Set for Clario with canister 0.5 l, with plugs and floater

- SafetyChamber
  Ref. 074.0002
  - For vacuum regulation
  - SafetyChamber for Clario with vacuum regulator knob and 2 valve discs

- Disposable suction tubing with fingertip, sterile
  Ref. 074.0003
  - Attaches suction catheter to pump for suctioning purposes
  - PVC
  - Length 150 cm, CH 25, sterile

- Vacuum gauge
  Ref. 074.0006
  - For measuring vacuum levels of the Clario pump
  - Can be plugged into lid of Clario canister
  - In kPa and mmHg

- SoftCase carrying bag
  Ref. 074.0007
  - For safe transportation of a home care pump and accessories
  - With 2 carrying straps for attachment to a wheelchair or as a backpack and handle

- Car connection cable
  Ref. 074.0017
  - For operating the Clario AC/DC pump in the car
  - 12 V DC cable

General Accessories

- Trolley small
  Ref. 077.0611
  - For transport and use of various accessories
  - Nickle-plated with 2 standard rails 10 x 25 mm
  - Mobile with 4 castors (2 of which have brakes)
  - Dimensions: 45 x 41 x 86 cm

- Clamp holder
  Ref. 077.0621
  - For attaching suction jars to standard rails
  - Polyamide

- Vario rail holder 10 x 25 mm
  Ref. 077.0621
  - For attaching Vario to standard rails
  - Aluminum holder

- Vario universal holder
  Ref. 077.0623
  - For attaching the Vario to rails
  - Holder for Vario can be rotated to 90°

- Carrying bag
  Ref. 077.0631
  - For safe transportation of the Vario and accessories
  - Sturdy carrying case with shoulder strap and pockets

- Car connection cable
  Ref. 077.0632
  - For operating the Vario AC/DC pump in the car
  - 12 V DC cable

Can be used together with Medela Fluid Collection Systems (Page 14/15), Tubings (Page 16), Filters (Page 17) and Connectors (Page 18)
Basic 30
Performance and flexibility

The Basic 30 provides reliable suction for multiple applications in medical practices, hospital wards, operating theatres and emergency departments.

Vacuum settings:
- max. 85 kPa 638 mmHg

Flow: 30 l/min

Dominant 50
Powerful performance

The Dominant 50 is a powerful, high quality suction pump with the high suction capacity necessary for surgical suction and liposuction.

Vacuum settings:
- max. 90 kPa 675 mmHg

Flow: 50 l/min

General Accessories

Can be used together with Medela Vacuum Assisted Delivery System (Page 12/13), Fluid Collection Systems (Page 14/15), Tubings (Page 16), Filters (Page 17) and Connectors (Page 18)

Ref. 017.0015
Apgar Timer
For reliable notification to perform Apgar tests
- Battery operated
- Acoustic signal after 1, 5 and 10 minutes
- Can be attached to standard rails

Ref. 077.0231
Clamp holder
For attaching suction jars to standard rails
- Polyamid

Ref. 077.0232 (480 mm)
more sizes:
Ref. 077.0233 (280 mm)
Quiver with holder
For storing catheters or suctioning instruments during an operation
- 2 parts. Holder (PC) and quiver (PP) can be attached directly to standard rails
- Length: 280 mm or 480 mm

Ref. 077.0723
Foot on/off switch
For turning the Basic 30 on/off
- Cable length 3.5 m

Ref. 077.0731
Foot vacuum regulator
For regulating the vacuum of the Basic 30
- Can be attached to standard Medela suction jars
- With hook and clamp holder for easy attachment to standard rails when not in use

Ref. 077.0751 (l)
Ref. 077.0752 (r)
more sizes:
Ref. 077.0753 (l)
Ref. 077.0754 (r)
Tubing holder
For attaching tubing to standard rails
- With unloseable attachment screw
- For either right or left-sided attachment

Ref. 077.0751 (l)
Ref. 077.0752 (r)
Can be used together with Medela Vacuum Assisted Delivery System (Page 12/13), Fluid Collection Systems (Page 14/15), Tubings (Page 16), Filters (Page 17) and Connectors (Page 18)

Ref. 077.0231
Foot vacuum regulator
For regulating the vacuum of the Dominant 50
- Can be attached to standard Medela suction jars
- With hook and clamp holder for easy attachment to standard rails when not in use

Ref. 077.0233
Foot on/off switch
For turning the Dominant 50 on/off
- Cable length 3.5 m

Ref. 077.0231
Clamp holder
For attaching suction jars to standard rails
- Polyamid

Ref. 077.0232 (480 mm)
more sizes:
Ref. 077.0233 (280 mm)
Quiver with holder
For storing catheters or suctioning instruments during an operation
- 2 parts. Holder (PC) and quiver (PP) can be attached directly to standard rails
- Length: 280 mm or 480 mm

Ref. 077.0751 (l)
Ref. 077.0752 (r)
more sizes:
Ref. 077.0753 (l)
Ref. 077.0754 (r)
Tubing holder
For attaching tubing to standard rails
- With unloseable attachment screw
- For either right or left-sided attachment

Ref. 077.0231
Apgar Timer
For reliable notification to perform Apgar tests
- Battery operated
- Acoustic signal after 1, 5 and 10 minutes
- Can be attached to standard rails
**Thopaz™**

**Advanced treatment with ease**

Thopaz sets new standards in thoracic drainage therapy relating to mobility, objective digital data and ease of use.

**Vacuum settings:**
- max. - 10 kPa

**Flow:**
- max. 5 L/min

**Thopaz Disposables**

Together with a canister and a tubing Thopaz is a complete thoracic drainage system.

- **Canister without solidifier, sterile**
  - Ref. 079.0011 (0.3 L)
  - Ref. 079.0016 (0.6 L)
  - Ref. 079.0018 (2.0 L)
  - more sizes:

- **Canister with solidifier, sterile**
  - Ref. 079.0017 (0.3 L)
  - Ref. 079.0012 (0.6 L)
  - Ref. 079.0019 (2.0 L)
  - more sizes:

- **Tubings, sterile**
  - Ref. 079.0021 (single)
  - Ref. 079.0022 (double)
  - Length 1.5 Meter

- **Tubings with small connectors, sterile**
  - Ref. 079.0024 (double)
  - Ref. 079.0023 (single)
  - Length 1.5 Meter

- **Sealing cap, sterile**
  - Ref. 079.0039
  - For closing an unused connection

**Thopaz Accessories**

The optimally designed accessories can be used for charging the battery, carrying and attaching Thopaz on rails, beds and IV poles.

- **Mains adapter international**
  - Ref. 077.0148
  - For charging the battery
  - With different plugs (Euro-UK-US-AUS/NZ)

- **Docking station**
  - Ref. 079.0037
  - For holding Thopaz and charging the battery
  - Can be attached to standard rails, beds* and IV poles*
  - *using a holder with standard rail

- **Adapter Docking station for Thopaz canister 2 liter**
  - Ref. 079.0038
  - For the safe fixation when using the 2L canister

- **Carrying strap**
  - Ref. 079.0031
  - For carrying Thopaz

- **Holder with standard rail**
  - Ref. 079.0036
  - For the easy attachment of Thopaz on rails, beds, IV poles
  - Can be fixed in a vertical or horizontal position using a tool

- **Universal holder with flexible standard rail**
  - Ref. 079.0040
  - For the easy attachment of Thopaz on rails, beds, IV poles
  - Stepless adjustment of the inclination of the rail (360°)

- **USB Cable**
  - Ref. 079.0034
  - For the connection of Thopaz with the PC
  - Type: 2.0 A/M - Mini B/M

Thopaz™

Together with a canister and a tubing Thopaz is a complete thoracic drainage system.

**Thopaz™**

Vacuum settings:
- max. - 10 kPa

Flow:
- max. 5 L/min

**Thopaz Disposables**

- Canister without solidifier, sterile
  - Ref. 079.0011 (0.3 L)
  - Ref. 079.0016 (0.6 L)
  - Ref. 079.0018 (2.0 L)
  - more sizes:

- Canister with solidifier, sterile
  - Ref. 079.0017 (0.3 L)
  - Ref. 079.0012 (0.6 L)
  - Ref. 079.0019 (2.0 L)
  - more sizes:

- Tubings, sterile
  - Ref. 079.0021 (single)
  - Ref. 079.0022 (double)
  - Length 1.5 Meter

- Tubings with small connectors, sterile
  - Ref. 079.0024 (double)
  - Ref. 079.0023 (single)
  - Length 1.5 Meter

- Sealing cap, sterile
  - Ref. 079.0039
  - For closing an unused connection

**Thopaz Accessories**

- Mains adapter international
  - Ref. 077.0148
  - For charging the battery
  - With different plugs (Euro-UK-US-AUS/NZ)

- Docking station
  - Ref. 079.0037
  - For holding Thopaz and charging the battery
  - Can be attached to standard rails, beds* and IV poles*
  - *using a holder with standard rail

- Adapter Docking station for Thopaz canister 2 liter
  - Ref. 079.0038
  - For the safe fixation when using the 2L canister

- Carrying strap
  - Ref. 079.0031
  - For carrying Thopaz

- Holder with standard rail
  - Ref. 079.0036
  - For the easy attachment of Thopaz on rails, beds, IV poles
  - Can be fixed in a vertical or horizontal position using a tool

- Universal holder with flexible standard rail
  - Ref. 079.0040
  - For the easy attachment of Thopaz on rails, beds, IV poles
  - Stepless adjustment of the inclination of the rail (360°)

- USB Cable
  - Ref. 079.0034
  - For the connection of Thopaz with the PC
  - Type: 2.0 A/M - Mini B/M
The Medela Vacuum Assisted Delivery System offers reliability and flexibility whenever the birth process requires vacuum assistance. Together with the Medela Basic 30 suction pump and your choice of rigid or soft, reusable or disposable suction cups and a wide range of accessories, the system delivers high quality performance.

**Reusable Suction Cups**

- **Malström Cup**
  - Autoclavable stainless steel
  - Used when the fetus is in the occiput-anterior position
  - Cup design allows for good seal to help minimise pop-offs
  - Sizes: Ø 40, 50 and 60 mm

- **Bird Cup**
  - Autoclavable stainless steel
  - Based on the design of the Malström Cup, with separate suction and traction ports
  - Sizes: Ø 40, 50 and 60 mm

- **Bird Posterior Cup**
  - Autoclavable stainless steel
  - Especially designed for use when the fetus is in the occiput-posterior position
  - Vacuum port on side of suction cup and low profile to ensure easier insertion.
  - Size: Ø 50 mm

- **Silc Cup**
  - Soft suction cup for vacuum assisted delivery
  - With silicone tubing, 1.5 m and 1 coupling piece
  - Sizes: Ø 50 and 60 mm

- **Silc Cup with trumpet valve**
  - Attaches gently to fetal scalp.
  - Smooth surface with longitudinal ridge makes it possible to observe rotation.
  - Sterile with 150 cm tubing
  - Sizes: Ø 60 mm

- **CaseAid Cup for Caesarean sections**
  - Autoclavable medical grade silicone.
  - Gentle support for delivering fetal head during Caesarean sections.
  - Can be attached to the pump used for suctioning during the operation.
  - Size: Ø 60 mm

**Disposable Suction Cups**

- **Single Use Silc Cup**
  - Attaches gently to fetal scalp.
  - Smooth surface with longitudinal ridge makes it possible to observe rotation.
  - Sterile with 150 cm tubing
  - Size: Ø 60 mm

- **Single Use Bird Cup**
  - Polycarbonate version of the reusable Bird Cup.
  - Traction handle can be tilted for use when the fetus is in the occiput-anterior or posterior position.
  - Sterile with 150 cm tubing
  - Size: Ø 60 mm
The Medela Fluid Collection Systems offer specialists easy handling and provide hygienic, user-friendly, and economic fluid management.

1. Reusable jar 2 l
2. Reusable jar with disposable liner 2.5 l
3. Reusable jar with disposable liner 1.5 l
Tubings

Large variety

For hygienic transportation of secretions, reliable tubings complete the high quality system. Depending on the application, Medela offers various materials, diameters and connection pieces with the tubing.

Silicone tubings

- Ref. 077.0951
- Ref. 077.0931
- Ref. 077.0970
- Ref. 077.0922 (60 cm)
- Ref. 077.0921 (30 cm)
- Ref. 077.0912 (60 cm)
- Ref. 077.0913 (100 cm)
- Ref. 077.0901 (1 m)
- Ref. 077.0902 (2 m)
- Ref. 077.0905 (5 m)
- Ref. 077.0900 (25 m)

Disposable tubing

- Ref. 077.0800 (25 m)

Silicone tubing with 1 coupling piece

- Ø 7 x 12 mm
- Lengths 1, 2, 5, or 25 m

Silicone tubing with 1 coupling piece and 90° angle

- Ø 7 x 12 mm
- Length 25 cm

Silicone tubes with 2 coupling pieces

- Ø 7 x 12 mm
- Lengths 30 or 60 cm

Silicone tubes with 1 coupling piece

- Ø 7 x 12 mm
- Lengths 60 or 100 cm

Disposable Filters

Filters have various uses. They can be used to prevent bacteria growth and the development of odours, for overflow protection or as protection of the system from particles. In order to suit these needs, Medela offers a large range of filters.

Disposable overflow protection/bacteria/odour filter

- Neutralizes odour, prevents an overflow and protects from bacteria
- With Medela connections
- Package of 10 pcs

Disposable overflow protection/bacteria filter

- Prevents an overflow and protects from bacteria
- Package of 10 pcs
- Choice of Medela or conical connections

Disposable bacteria filter

- Protects pump and environment from bacteria
- Package of 10 pcs
- Choice of Medela or conical connections

Disposable bacteria/odour filter

- Filters and neutralizes odour and protects from bacteria
- Package of 10 pcs
- Choice of Medela or conical connections

Disposable particle filter

- Protects pump from dust build-up
- Ideal for use in dental office for filtering bone particles
- Package of 10 pcs
- With Medela connections

Disposable hydrophobic filter

- Prevents overflow and contamination of pump
- Porex filter in PE holder for Medela lids
- Package of 10 pcs
Connections
Easy fit and functionality

Connecting tubings to each other or to accessories often requires connection pieces. These have been carefully developed to fulfill the requirements for a tight connection and easy fit.

Reusable and disposable connections

- **Angle piece**
  - Ref. 077.1015 (Ø 6-10 mm)
  - Other sizes:
    - Ref. 077.1016 (Ø 10-14 mm)
  - Connects lid/suction liners to patient tubing and prevents bending
  - Polypropylene
  - Package of 10 pcs
  - Sizes: Ø 6 - 10 or 10 - 14 mm

- **Double conical coupling piece**
  - Ref. 077.1017
  - Connects tubings to each other
  - Polypropylene
  - Package of 10 pcs

- **Coupling piece**
  - Ref. 077.1018
  - Connects tubing to Medela connections (lid, change-over-valve, etc.)
  - Polyoxymethylene with 2 blue silicone o-rings
  - Package of 10 pcs

- **Coupling piece 90°**
  - Ref. 077.1019
  - Connects tubing to Medela connections (lid, change-over-valve, etc.)
  - Polyoxymethylene with 2 blue silicone o-rings
  - Package of 10 pcs

- **Y-piece**
  - Ref. 077.1020
  - For attaching 2 tubings to the same vacuum source
  - Polypropylene
  - Package of 10 pcs
